NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) DOCUMENTATION FOR THE OPERABLE UNIT 4
INTERIM MEASURE/INTERIM REMEDIATION (IM/IRA) - SRK-259-93

Attached are copies of an Environmental Checklist and an Action Description Memorandum for the subject project. These two documents have been reviewed by the Rocky Flats Plant NEPA Compliance Committee. The Committee recommended that an environmental assessment is the appropriate form of NEPA documentation for the OU 4 project.

Please note that the attached documents include removal of Building 788. DOE has directed EG&G to accelerate the closure of the Resource Conservation and Recovery Act (RCRA) units and removal of Building 788. There are no future plans to use the treatment unit in Building 788, and the storage unit can be consolidated with storage on the 750 Pad. Removal of the building does not commit DOE to any action on the OU 4 remediation and does not preclude a no-action alternative for the remediation. DOE has independently justified the removal in their decision-making that led to the desired acceleration of the removal. We request your NEPA determination for the Building 788 removal to allow us to pursue DOE's directive that the building be removed by the end of Fiscal Year 1994.

We request a NEPA determination within 10 days of your receipt of this letter, as agreed to in the project schedule. Please contact the Ecology and NEPA Division's Steve Nesta, X8605, or Claire Reno, X4084 if you have any questions or require further information.
